

Credit Name: Zubair Bechir								
Assignment Name: Chapter 5								
<b>The following questions can help you in thinking critically about your problem-solving processes:</b>								
<b>Understanding the Problem</b>								
How did you approach understanding the challenge?					I read through the steps carefully			
Were there any parts of the problem you found confusing at first? If so, how did you resolve that confusion?								
<b>Planning the Solution</b>								
Did you create a plan or break the problem into smaller steps before coding?					Yes I always start with the mastery			
How did you decide on the tools, data structures, or algorithms to use?								
<b>Implementation</b>								
Did you write the code in small pieces or attempt the entire solution at once?					Small pieces			
How did you test your solution along the way to make sure it was working?								
<b>Overcoming Challenges</b>								
What part of the problem was the most difficult for you?					Probably crt			
How did you handle moments when you felt stuck or unsure of what to do next?					Read it again			
<b>Learning</b>								
Was there anything you learned that you think will help you with future challenges?					Yes, taking my time to make sure my code is correct.
