

**Include your IPO Chart with your code in Eclipse IDE:** We will discuss and demonstrate this in the computer lab.

## **IPO CHART**

<b>Program name:</b>	<b>[TYPE PROGRAM NAME HERE]</b>	
<b>INPUT</b>	<b>PROCESS</b>	<b>OUTPUT</b>
Hint: What will the user input?	Hint: What is the program going to do with the input information?	Hint: What will the screen display after user input?
[Enter diameter of the pizza in inches: 10]	<p>[It then takes that number and uses it in a formula to calculate how much it costs to make the pizza.</p> <p>Specifically, the diameter is squared (diameter * diameter) and multiplied by 0.05 to find the material cost.</p> <p>Then the program adds labor cost (\$0.75) and rent cost (\$1.00) to get the total cost.</p> <p>Finally, it outputs the total cost to the user in dollars, formatted to two decimal places.]</p>	[The cost of making the pizza is: \$6.75]
