

Credit Name:								
Assignment Name:								
<b>The following questions can help you in thinking critically about your problem-solving processes:</b>								
<b>Understanding the Problem</b>								
How did you approach understanding the challenge?				- I went over what I was going to do and did everytjing step by step.				
Were there any parts of the problem you found confusing at first? If so, how did you resolve that confusion?								
<b>Planning the Solution</b>								
Did you create a plan or break the problem into smaller steps before coding?				Yes.				
How did you decide on the tools, data structures, or algorithms to use?								
<b>Implementation</b>								
Did you write the code in small pieces or attempt the entire solution at once?				Big pieces				
How did you test your solution along the way to make sure it was working?				made sure there were no error in my codes, and if there were id go back and fix it.				
<b>Overcoming Challenges</b>								
What part of the problem was the most difficult for you?				Error code				
How did you handle moments when you felt stuck or unsure of what to do next?				I went over and broke down the steps.				
<b>Learning</b>								
Was there anything you learned that you think will help you with future challenges?				Yes, I know how to fix my code when there is an error pretty well.
